

# SAMPLING AND TESTING

## UNDER O.REG. 170/03

The following provides some general guidelines on what to test for and where to take samples when sampling under O. Reg. 170/03. Please note that the frequency of sampling and the specific tests required can vary depending on the classification of the Drinking Water System as well as other factors such as issuance of a Director's Order to test. This document is for general guidance only.

\* If your facility is a school, private school or day nursery please refer to Testmark's Guidance document on sampling under O. Reg. 243/07; lead testing under Schedule 15.1 and 15.2 of O. Reg. 170/03 requires sampling at a “Plumbing” location. Plumbing in this sense refers to water samples at a location after the property service connection to the main Distribution system.

### Garson
